## Profile

Full-stack developer passionate about building intelligent agentic AI, and automation-first web applications. Skilled in React, Node.js, WebSockets, and modern backend tooling with a passion for solving real-world problems using AI and LLMs.

## Skills

React | Express | FastApi | Node.js |  
LangGraph & LangChain | Prisma | Python

## Projects

### Automated GitHub AI README Generator

*React.js, FastApi, LangGraph, Tailwind CSS*

Automated the generation of professional README.md files for GitHub repositories by leveraging AST-based code parsing and LLM summarization. Reducing manual documentation timethrough a system that supports instant generation via repo URL or seamless automation via GitHub webhooks where Readme updates are triggered automatically on every main branch commit

### Automated Ticket Submission & Triage Portal

*React.js, FastApi, LangGraph, LangChain*

Developed an AI-powered support ticket platform that uses a LLM to automatically categorize and route user-submitted issues to the correct development team, improving triage efficiency. Achieved this by implementing intelligent classification (React, Java, Python, SQL) and generating detailed summaries, technical analysis, and suggested solutions for faster resolution.

### Real-Time Interactive Quiz Platform

*React Node.js Web Sockets*

Built an interactive quiz app with real-time participation using WebSockets. Admins can host and schedule quizzes, users join via codes, and results update live with a real-time leaderboard —ideal for classrooms and events.

## Education

### B. Tech

*Muthoot Institute of Technology and Science*

2022/10 – present

7.2 CGPA

### Higher Secondary

*St Joseph's Higher Secondary School Pulincunnoo*

2019/06 – 2021/03

96%

### 10th Grade

*KE Carmel School, Pulincunnoo*

2019/03

92.5%

## Certificates

### Introduction to Machine Learning

NPTEL

### Foundation of Cloud IoT Edge ML

NPTEL

### Artificial Intelligence Fundamentals

IBM SkillsBuild

### Linguaskill

B2

## Languages
